OBJECTIVE

BCA student (6th Semester) at CHRIST (Deemed to be University) with hands-on project experience across full-stack development, cloud computing, AI, and AR/VR (Three.js, WebXR), seeking an internship in web development, cloud/database systems, or applied AI.

WORK EXPERIENCE & INTERNSHIPS

Inventeron Technologies and Business Solutions LLP, Bengaluru *Apr – Jun 2025*
Trainee Software Engineer (Web Development)

- Completed an 8-week offline Trainee Software Engineer internship: built and tested front-end web application features using HTML, CSS, and JavaScript, with UI development, debugging, and module-level delivery
- Collaborated with the development team across the software development lifecycle (SDLC), following company coding standards, team workflows, and real-world engineering practices

PROJECTS

Basketball Club Management System | *MongoDB, Node.js, React.js*

- Developed a full-stack MERN web application (MongoDB, Express.js, Node.js, React.js) with user authentication, CRUD operations, match scheduling, player profiles, and performance-tracking dashboards

EcoTrack — Carbon Footprint Tracking App | *React, Flask, Firebase (Firestore, Auth), Gemini API*

- Built a full-stack web application (React, Python Flask REST API, Cloud Firestore NoSQL) converting daily activity across 7 categories into quantified CO2e using DEFRA, IPCC, CEA India, and Our World in Data emission factors
- Built a data-analytics dashboard, reduction goal tracking, and Gemini API AI assistant; secured with Firebase Authentication and deployed to production on Firebase Hosting (ecotrackapp.web.app)

God's View — Universe Simulator | *Three.js/WebGL, WebXR, NASA & ISS APIs, n8n*

- Built a framework-free 3D simulation (Three.js, WebGL, JavaScript) of cosmic evolution, from the Big Bang to the observable universe, with WebXR AR/VR immersive headset support
- Integrated real-time NASA and ISS REST APIs for live telemetry and an n8n workflow-automation AI scene assistant

WaterGuard — Smart Water Monitoring App | *React Native, Expo, JavaScript*

- Developed a cross-platform mobile app (React Native, Expo, JavaScript) with component-based architecture, water-level visualization (simulated sensor data), threshold-based alerts, historical readings, and monitoring dashboards
